Introduction to ETEX

GEO2020 - 1/12/2017

Stelios Vitalis, Hugo Ledoux

Outline for Section 1

- 1. Writing Documents
 - 1.1 Good and Bad Practices
 - 1.2 Separating Content from Formatting
 - 1.3 What is ETFX
- 2. Using ATEX
 - 2.1 Getting Started
 - 2.2 Structure Elements
 - 2.3 Math
 - 2.4 Tables
- 3. References and External Programs
 - 3.1 References and Bibliography
 - 3.2 Graphics
 - 3.3 Templates
 - 3.4 Exercise

Typical Word Processor

Formatting Words

That's bad...

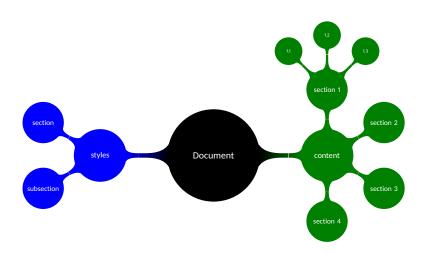

Typical Word Processor

Using Styles

That's better...

Separating Content from Formatting

Attitude adjustment

A new approach

- Use commands to describe "what it is", not "how it looks"
- Focus on your content
- Let LaTEX do its job

What is **ETEX**

The Engine

A simple document

```
\documentclass{article}
\begin{document}
Hello World! % This is just comments...
\end{document}
```

Outline for Section 2

- 1. Writing Documents
 - 1.1 Good and Bad Practices
 - 1.2 Separating Content from Formatting
 - 1.3 What is ETEX
- 2. Using LATEX
 - 2.1 Getting Started
 - 2.2 Structure Elements
 - 2.3 Math
 - 2.4 Tables
- 3. References and External Programs
 - 3.1 References and Bibliography
 - 3.2 Graphics
 - 3.3 Templates
 - 3.4 Exercise

Using ETEX

Different options

- Install it locally:
 - A distribution (engine and packages):
 - » MiKTeX (Windows)
 - » MacTeX (OSX)
 - » TeXLive (Linux)
 - An Editor:
 - » TexStudio (Windows, OSX, Linux)
 - » TexMaker (Windows, OSX, Linux)
 - » Other (Wikipedia Comparison)
- Use it online:
 - Overleaf
 - ShareLatex

```
\documentclass{article}
\title{A Title}
\author{John Doe}
\begin{document}
  \maketitle
  \section{This is a section}
  Some text here.
  \subsection{This is a subsection}
  Some other text here.
  \subsection{This is another subsection}
  Guess what!
```

This is another piece of information...

10/24

Simple Structure

A Title

John Doe

December 1, 2017

This is a section

Some text here.

1.1 This is a subsection

Some other text here.

1.2 This is another subsection

Guess what!

This is another piece of information...

Structure Elements

- Tea
- Milk
- Biscuits

```
\begin{figure}
     \includegraphics{chick}
\end{figure}
```

```
\begin{equation}
    \alpha + \beta + 1
\end{equation}
```

$$\alpha + \beta + 1$$
 (1)

Source code

For the most part, you can just type your text normally.

Words are separated by one or more spaces.	Words are separated by one or more spaces.
Paragraphs are separated by one or more blank lines.	Paragraphs are separated by one or more blank lines.

• Space in the source file is collapsed in the output.

The	rain	in Spain	The rain in Spain falls mainly
falls	mainly on	the plain.	on the plain.

Add \usepackage to the pre-ample to add functionality

Math

• Why are dollar signs special? We use them to mark mathematics in text.

```
% not so good:
Let a and b be distinct positive integers, and let c = a - b + 1.

% much better:
Let $a$ and $b$ be distinct positive integers, and let c = a - b + 1.

Let a and b be distinct positive positive integers, and let c = a - b + 1.

Let a and b be distinct positive integers, and let c = a - b + 1.
```

- Always use dollar signs in pairs one to begin the mathematics, and one to end it.
- ETEX handles spacing automatically; it ignores your spaces.

```
Let y=mx+b be \ldots

Let y=mx+b be ...

Let y=mx+b be ...
```

Math Notation

• Use caret 🕥 for superscripts and underscore 🗋 for subscripts.

$$y = c_2 x^2 + c_1 x + c_0$$
 $y = c_2 x^2 + c_1 x + c_0$

• Use curly braces $\{ \} \}$ to group superscripts and subscripts.

$$F_n = F_{n-1} + F_{n-2}$$
 % oops! $F_n = F_{n-1} + F_{n-2}$
 $F_n = F_{n-1} + F_{n-2}$
 $F_n = F_{n-1} + F_{n-2}$

• There are commands for Greek letters and common notation.

\$\mu = A e^{Q/RT}\$
$$\mu = Ae^{Q/RT}$$
 \$\0mega = \sum_{k=1}^{n} \omega_k\$
$$\Omega = \sum_{k=1}^{n} \omega_k$$

Tables

The argument specifies column alignment — left, right, right.

It also specifies vertical lines; use \hline for horizontal lines.

```
\begin{tabular}{||r|r|} \hline

Item & Qty & Unit \$ \\\hline

Widget & 1 & 199.99 \\
Gadget & 2 & 399.99 \\
Cable & 3 & 19.99 \\hline
\end{tabular}
```

Item	Qty	Unit \$
Widget	1	199.99
Gadget	2	399.99
Cable	3	19.99

• Use an ampersand (a) to separate columns and a double backslash (y) to start a new row (like in the align* environment that we saw in part 1).

Outline for Section 3

- 1. Writing Documents
 - 1.1 Good and Bad Practices
 - 1.2 Separating Content from Formatting
 - 1.3 What is ETEX
- 2. Using ATEX
 - 2.1 Getting Started
 - 2.2 Structure Elements
 - 2.3 Math
 - 2.4 Tables
- 3. References and External Programs
 - 3.1 References and Bibliography
 - 3.2 Graphics
 - 3.3 Templates
 - 3.4 Exercise

Cross-referencing

- Use \label and \ref for automatic numbering.
- The amsmath package provides \eqref for referencing equations.

```
\documentclass{article}
\usepackage{amsmath} % for \egref
\begin{document}
\section{Introduction}
\label{sec:intro}
                                                1 Introduction
In Section \ref{sec:method}, we \ldots
                                                In Section 2, we ...
                                                2 Method
                                                             e^{i\pi} + 1 = 0
\section{Method}
                                                 By (1), we have ...
\label{sec:method}
\begin{equation}
\label{eq:euler}
e^{i \cdot pi} + 1 = 0
\end{equation}
By \earef{eq:euler}, we have \ldots
```

18/24

bibT_FX

• Put your references in a .bib file in 'bibtex' database format:

```
@Article{Jacobson1999Towards.
  author = {Van Jacobson},
  title = {Towards the Analysis of Massive Multiplayer Online
           Role-Playing Games },
  journal = {Journal of Ubiquitous Information},
  Month = jun,
 Year = 1999.
 Volume = 6,
  Pages = \{75 - 83\}
@InProceedings{Brooks1997Methodology.
  author = {Fredrick P. Brooks and John Kubiatowicz and
            Christos Papadimitriou .
  title = {A Methodology for the Study of the
           Location-Identity Split ..
  booktitle = {Proceedings of OOPSLA},
  Month = jun,
  Year = 1997
```

bibT_EX

- Use the natbib package¹ with \citet and \citep.
- Add \bibliography and \bibliographystyle at the end.

```
\documentclass{article}
\usepackage{natbib}
\beain{document}
\citet{Brooks1997Methodology}
show that \ldots. Clearly.
all odd numbers are prime
\citep{Jacobson1999Towards}.
\bibliographv{bib-example}
% if bib-example' is the name of
% vour bib file
\bibliographystyle{plainnat}
% try changing to abbrvnat
\end{document}
```

Brooks et al. [1997] show that Clearly, all odd numbers are prin [Jacobson, 1999].

References

Fredrick P. Brooks, John Kubiatowicz, and Christos Papadimitriou. A methology for the study of the location-identity split. In *Proceedings of OOPSL* June 1997.

Van Jacobson. Towards the analysis of massive multiplayer online role-playi games. Journal of Ubiquitous Information, 6:75–83, June 1999.

Manage Refereces

External Program

- Use a tool like JabRef.
- All scientific websites can export to bibT_FX format.
- Save references as .bib file and link it from your 上 document.

Designing Graphics

Suggested Tools

- Vector graphics (Graphs, Charts, Figures):
 - Adobe Illustrator (Proprietary)
 - Inkscape (Open Source)
 - draw.io (Free and Online)
 - TikZ package on ET_FX (for brave people)
- Image Editing
 - Adobe Photoshop (Proprietary)
 - GIMP (Open Source)

Templates for GEO2020

Use them as starting point

- P2 Template: https://tinyurl.com/mscgeomp2.
- Final Thesis: https://tinyurl.com/mscgeomthesis.

Let's do an exercise

Try to make the source look like the final example.

- Source: https://tinyurl.com/latex-exerc-source
- Final: https://tinyurl.com/latex-exerc-final
